Arrow Flow - Shooter Puzzle Video: Conveyor Overload (Iteration 4)

Objective:

The conveyor is almost full, one wrong move and its game over

Store Links:

- Reference Playable

Visual:

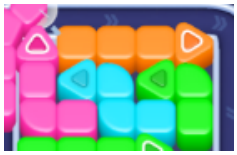

- 3D
- 3D Perspective

Scan Screen:

- A hand icon gently taps on the first move of the screen to indicate what the player's supposed to do
- Then disappear and reappear every 3 seconds
- **Mockup Note/Video Start:** The screen should be filled with urgency, the starting percentage for the conveyor belt should be 99% **WITHOUT** any blue tiles present and all shooters should be blue (This is the hook of the video)

Core Gameplay:

- **Core gameplay Loop:**
  - **Select:** player taps on the arrow can be freed from the board and onto the conveyor belt + percentage at the bottom increases
    - Arrows that can be freed have a white highlight on the pointer that lights up
    - If a blocked arrow is clicked, only the pointer moves and feedback sound gets played to indicate an invalid move

  - **Target:** The player keeps freeing arrows to clear the board, making sure that the colors free match the colors of the shooters at the top

    - **The Rule of Shooting:** Once the blocks are on the conveyor belt, if the color matches one of the **3 shooters** at the top of the screen, the same bullets would hit the same colored blocks and make them disappear.
    - **Goal (Clearing):**
        - ***Trigger:*** similar color of the block on the conveyor belt + similar color of shooter and the frontmost of the line
        - ***Reaction:*** Shooter fires a bullet at the clock, making it disappear and clearing it from the conveyor belt
        - ***Particle Effect:*** Block dissolves into tiny particles
        - ***Resolution:*** The number on the shooter ticks down + next shooter in line moves forward if the number reaches 0 + percentage on the bottom of the screen lowers
- **Block colors present + Total number:**
    - **Dark Blue:** 56 blocks
    - **Black:** 41 blocks
    - **Light Blue:** 36 blocks
    - **Pink:** 30 blocks
    - **Orange:** 18 blocks
    - **Green:** 12 blocks
    - **White:** 50-60 blocks (not present in the image but the color of the blocks on the conveyor belt)

Fail State:

- If the conveyor belt reaches 100% + The shooters can't clear any blocks (Both conditions must be met)

Design

MOCKUP NOTES:

- Follow the direction and colors of the arrows
- Mockup should match the overall artstyle of the game
- Only arrows that can be cleared immediately have color. Everything else would be grey until they're free
- Images below are: Level Design + Grid (**left**), and Game Art Style (**right**)
